

## EZ XST

EZ XST is available for summer treatment of diesel fuel. EZ XST contains the same quality components as EZ XWT except the cold flow improvers and deicers. One gallon of EZ XST treats 1500 gallons of diesel. EZ XST is also available in 2 1/2 gallon jugs, 55 gallon drums, and 330 gallon totes.

## EZ ADD Onboard Additive Metering System

EZ ADD can be installed on diesel engine driven equipment (tractor trucks, buses, generators, construction equipment, boats, etc). EZ ADD automatically dispenses the proper amount of additive into the fuel during refueling and can be used with any diesel additive. EZ ADD is totally hands free - the operator does not have to enter any numbers or activate the system. With EZ ADD, we do the measuring - **“SO YOU DON’T HAVE TO!”**

EZ ADDitives and EZ ADD are distributed by:

Queen Fuel Components, LLC  
Shelby, NC 28152  
[www.ezadd.biz](http://www.ezadd.biz)

Made in USA

EZ ADDitives are EPA Registered. Queen Fuel Components, LLC is listed in the CCR and located in a HUBZone. DUNS #96-154-5691. NAICS Codes: 424690, 424720, 423860, 423120, 324191, 324199, 325110, 336120, 336399

# EZ XWT

Premium Winter Diesel Additive

DO NOT MIX WITH OTHER FUEL ADDITIVES UNLESS SPECIFICALLY RECOMMENDED BY THE MANUFACTURER. FOLLOW LABEL DIRECTIONS ON BACK.

A dirty engine can mean lower mileage and shorter engine life. Conditioning your engine's insides with EZ XWT Premium Diesel Additive can result in better mileage, fuel savings, and improved engine performance.

## Super Concentrate for Multiple Treatments

One gallon of EZ XWT Premium Diesel Additive treats 1000 gallons of diesel. EZ XWT is available in 2 ½ gallon jugs, 55 gallon drums, and 330 gallon totes.

## Detergency

Superb detergency promotes more complete combustion of diesel fuel in the cylinders. Improved combustion leads to reduced emissions of hydrocarbons, carbon monoxide, and particulates, as well as reduced opacity (smoke). Power and fuel economy are improved as a result.

- **Controls deposits on fuel injector nozzles**
- **Prevents gum and deposit formation on injector parts**
- **Reduces emissions**
- **Cleans up pistons**
- **Restores lost fuel economy**
- **Restores horsepower**

## Winter Operability

At cold temperatures, diesel fuel begins to gel and form wax crystals which can clog fuel pump and filtration components. Also, water content (which is normal in small amounts in diesel fuel) begins to form ice crystals which can also cause clogging.

EZ XWT Premium Diesel Additive contains cold flow improvers and deicers to modify the size and shape of wax crystals and to inhibit ice and wax crystal formation to reduce clogging of fuel system components.

## Premium Diesel Additive can help:

- Improve fuel economy
- Reduce emissions
- Clean up and keep engine clean
- Meet lubricity requirements suggested by engine OEMs
- Improve fuel stability
- Provide corrosion protection
- Reduce pour point by as much as 35°F
- Reduce cold filter plugging point by as much as 22°F
- Protect against ice at temperatures down to -50°F
- Boost cetane by up to 4 numbers

## Lubricity

As the sulfur content of diesel fuel has been reduced from 5,000 to 500 to 15 parts per million, the lubricating characteristic of diesel fuel has also been reduced. EZ XWT Premium Diesel Additive provides additional lubricity to help exceed ASTM D6079 and to help meet the Engine Manufacturer's Association recommendations.

EZ XWT can help increase service life of fuel handling and metering system parts and components without contributing to combustion deposits.
